

Hello! I'm Melanie Morris, an estimator at Jackson Contractor Group with 20 years' experience in the construction industry. For the initial 14 years of my career, I had the unique opportunity to work on projects across the US and Canada for a large heavy civil contractor, experiencing life on the move every two years and tackling assignments in remote locations. However, the desire for a change of pace and a stronger connection to my family roots brought me to Missoula 6.5 years ago. I am thrilled to be in Montana, embracing all the adventures it offers, and being closer to my happy place, Georgetown Lake. More importantly, I am excited to finally live and work in a community that I can call home and proudly be an active part of.
