

My name is LeAndra Spencer. I was born in El Paso Texas. My dad was an Army officer so we moved around a lot, but he was born and raised in Montana, and we would spend summers here so in 2012 I packed up the little I had and made the journey north. Moving helped me learn how to talk and interact with anyone and everyone. Something I have been able to use in most aspects of my life. I have two boys 1 and 8 who take up most of my time but when I do not have them, I like to be out on the water, hiking or just enjoying some quiet time. I have my undergrad in Health Care Administration, and I am working on my MBA. I am really looking forward to making connections and learning more about Missoula and the people who live and work in the community.
