Phone: 406-214-0538

Work Website: [www.roseburg.com](http://www.roseburg.com)

I was born and raised in Kansas City, Missouri and I moved to Missoula, Montana when I was 18 after finishing high school. I am married and I have three sons. I have really liked living in a smaller town to raise my family. My sons are Tate that will be a senior at Sentinel, Bode that will be a freshmen at Sentinel and Reid will be in 4<sup>th</sup> grade at Jeanette Rankin. My husband, TJ, works for Montana Highway Patrol. My family likes all of the recreation year round in Missoula. We hike, bike, ski, snowshoe and most recently bought a camper. We like to be outdoors and seeing all of the beautiful things God has created...

When I got to Missoula, my first job was working for Cellular One. It was a great opportunity for me and I worked my way up the ladder over the course of 17 years and four different buyouts, eventually working for AT&T. The only reason I left was because there was some restructuring and it was going to require me to travel the majority of the time and I did not want to be gone from my then three small boys. Next, I went to work for USBank for 18 months and was a Banker and Assistant Branch Manager, I met and worked with many great people but I did not think that the banking world was a good fit for me. I then moved over Roseburg in March of 2018. I had no experience in the manufacturing world but the job really interested me and they were very family oriented and would help me be the kind of mom I really wanted and needed to be. I was hired as a Plant Scheduler, this role is responsible for figuring out how much of each product is to be made at each machine center and keep all the material flowing through the mill to become finished products. I had a really great teacher, learned a lot, and really got pretty good at it. I really appreciated how great of a management team we have had at the mill, we work together and all working for the same goal. I was the Scheduler for 2.5 years when an opportunity opened up to move into a Sales role, which I had a lot of experience from in the wireless industry. That was great to be able to talk to clients and work for them to have the best experience possible with Roseburg. Over the course of that 1.5 in sales, the mill was unable to find a new Scheduler that was effective and very recently offered me a pay increase to come back. I have gained valuable experience in both of these

roles that I do feel will help in my future with the company. I feel that moving back to this role is helping the greater need for our business. If the mill doesn't run effectively then we will not have a great client experience and could result in fewer orders, definitely not the path we want slip into.

I look forward to learning a lot in Leadership Missoula. I have had a few other friends that have had great experiences. Learning more about our community and I am sure some things that I can bring back to help at Roseburg.
